

Shruti Kulkarni

✉ shrutikulkarni622@gmail.com

☎ 9511800864

- Dedicated and results-oriented professional with 4 years of hands-on experience in the fields of Python, PySpark, Hadoop, and Hive and a total 8.5 years in IT. Experienced in designing data pipelines analyzing and troubleshooting code, supporting business users and delivering
- Reliable data solutions for banking and insurance reporting.
- Seeking to leverage technical proficiency and problem-solving skills in a challenging role focused on data engineering.
- Having good knowledge of PySpark, Python, HDFS, YARN, Hive, Sqoop and SQL.
- Capable of processing large sets of structured, semi-structured and unstructured data.
- Data from existing databases that provide SQL interfaces using Sqoop.
- Loaded the dataset into Hive for ETL Operation.
- Good exposures in Requirement Analysis, problem solving skills, good communication and interpersonal skills
- Hands-on experience to with data validation, performance optimization and requirement gathering.
- Good exposure to agile methodology
- Proficient in Python Automation scripting.
- Proficient in client communication and requirement gathering

PROFESSIONAL EXPERIENCE

Senior Consultant(Data Engineer,Banking Domain,Capgemini)

July 2017-Present

- Ingested and processed large sets of structured data and semi-structured data from source to hdfs using pyspark and hive.
- Imported and transformed hive,configuration,fact and dimension tables for downstream reporting.
- Implemented logic to interpret and apply finance-driven configuration files,dynamically transforming base datasets.
- Designed and executed metric reallocation strategies based on stakeholder requirements,ensuring accurate financial insights.
- Analyzed and optimized Pyspark jobs,SQL queries and spark configurations to improve application performance and processing stability.
- Automated validation process to improve accuracy and reduce manual efforts during UAT cycle.
- Investigated data issues reported during UAT and production validation,performed root cause analysis and implemented corrective solutions.
- Supported application enhancements by analyzing existing code,implementing changes and validating results with stakeholders.
- Created and managed external hive tables, leveraging partitioning and bucketing
- Delivered curated datasets to downstream teams for high-level analysis, dashboards and reporting

Data Engineer (HealthCare Domain,Expert Global)

Feb 2022-Feb 2024

- Pre-Processing the data in PySpark as per the requirements.
- Raise JIRA for Infrastructure, Platform issues.
- Engage with BA to understand the requirements clearly.
- Monitor Spark jobs and Sqoop jobs.
- Perform optimization techniques in order to enhance performance of Spark jobs
- Storing the final processed data in to Hive table with optimum use of Hive Optimization techniques.
- Monitor Data Validation, apply best data quality rule on data
- Engineer Written Hive Queries, spark queries for Data Analysis to meet the business requirements.

Data Engineer

May 2021-Feb 2022

- Automate the manual data transfer, data collection and fetching(from semi-structured sources) tasks using python scripts
- Automate the data analysis defining the transformation rules and designing scripts
- Develop the python scripts to design the solution based on data transformation

- Develop the python scripts to fetch technical data for algorithm development team and operational data for management team
- Playing key role in implementation of scripts in to production
- Expertise in providing data driven solutions to critical business problems
- Automate the regular excel reporting using python scripts
- Collecting client requirements and train the teams accordingly

EDUCATION

Bachelor of Engineering In Computer Science

Deogiri College of Engineering and Management Studies(2013-2017)

MBA

Deogiri College of Engineering and Management Studies(2018-2020)

SKILLS

- | | |
|-------------------|---------------------------|
| • Pyspark | • SQL |
| • HDFS,Hive,Sqoop | • CI/CD tools |
| • Python | • Jira,Confluence,Autosys |

CERTIFICATIONS

- Ocean certification for Python/pyspark scripting
